

Company profile

# Raw Materials International

The company

# Fragrances since 1982

We are an Italian manufacturer of fragrances located in the industrial Piedmont area. We are part of a European group that has been involved in the production and trade of essential oils, absolutes and aroma chemicals since 1982.

Our fields of expertise are fine fragrances, candles, fragrances for soaps and detergents and, of course, natural ingredients and specialties.

Research and  
quality: the keys  
of our success

## Research and development

Our R&D team consists of perfumers and analysts who have the task of identifying critical issues specific to each product or process and taking an active role in the optimization for all our clients' requirements.

## Natural products, at their best

RMI's success has been based on technical skills, as we have a strong background and understanding of natural products, which are key to create powerful scents for our customers.

People and technology

# Team and factory

Our team is now of 65 people in Europe, and we have just built an almost 28,000 sqft factory in Villafranca Piemonte.

Our factory is equipped with automatic and semi-automatic production facilities and this has resulted in a substantial increase in our production capacity; furthermore, we are well equipped to undertake any new developments.

The market

# International outlook

The RMI customer base has grown from Europe to North Africa and now to the Middle East.

We have our designated business development manager based in Dubai to cover Middle East, Africa and Asia regions.

Raw Materials International Srl
